**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 07 March 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over any of JP 05-194915, JP 025-047249, JP 05-345881, WO 97/05206 or Tucker et al (5498476) in view of any of Melbye (4604153) Harvie et al (5693405) or Aakermann (6680098).

All of the primary references teach a recyclable pressure sensitive tape comprising a polyolefin base material and an inorganic flame retardant. Refer to the Abstracts of the three JP references along with the applicants' discussion thereof on pages 2 and 3 in the IDS filed July 23, 2003. Refer to Abstract and pages 2-4 in WO 97/05206. Refer to Abstract and column 4, line 10 through column 5, line 67. As the applicant pointed out in the IDS filed July 23, 2003 the primary references fail to teach the at least one character and a design constituted of a structure comprising recesses and/or protrusions.

All of the secondary references teach to form indicia on a plastic film in order to be able to provide indicating means thereon. Refer to figures 7 and 8 in Melbye. Refer to figures 4 and 5 in Harvie et al that show a raised logo (34,53). This reference is particularly pertinent since layer 42 can be an adhesive layer (column 7, lines 32-34),

Art Unit: 1772

therefore directly showing the embossing in the backing layer as recited by the applicant. Refer to figure 1 showing indicia 12, 13 on a backing layer 9 or 10 of a label (i.e. tape like structure) along with column 5, line 21 through column 6, line 24. Layer 9' can be an adhesive layer, which then forms a tape structure as recited (i.e. backing layer and adhesive layer).

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to the primary reference to include characters and/or designs in the backing layer of the tape, as shown by the secondary references, in order to provide indicating indicia thereon motivated by the fact that the secondary references teach this is a desired property in backing layers of tapes. WO 97/05206 specifically teaches a recyclable feature of the tape (second paragraph of page 2) and it is known from containers (e.g. milk jugs) to have a protruding symbol indicating recyclability.

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 1-9 have been considered but are moot in view of the new ground(s) of rejection.
